

Floods 6B Yau Hiu Ching, Coby

There are different kinds of natural disasters. I am going to talk about floods.

A flood is a very strong column of air. I can cause a lot of damages and problems. It can damage houses and destroy facilities. It can kill people too.

We all can do some charity work to help the flood victims. We can donate money to charity like Red Cross. We can collect old clothes and go on a charity walk to raise money for the people in need.

How can we keep ourselves safe when there is a flood? If there is a flood, we should stay in safe areas. We can live in houses that can float on the water or live in houses that have stilts.

We should all learn more about natural disasters. We should keep ourselves safe and help others when we can. Let's learn more and do more!
